

Target

**Use in brewing:**

Dual purpose hop.
An excellent high alpha variety which gives bitterness at a very competitive price. Tends to be too harsh for aroma purposes late in the boil but has produced very good results when used as dry hop pellets in the cask.

Substitutions:

Fuggles, Willamette

Origin/History:

Target was released in 1972 and was the first result of a Wye College breeding programme to produce a wilt tolerant high alpha variety. It has rapidly established itself as the most widely grown English variety, with nearly half of the market.

Storage:

Poor to Moderate.

Cedar, Orange, Pine

UK Belgium

Alpha Acid	9-12%
Beta Acid	4-6%
Cohumulone	35-40
Oil Composition	Myrcene: 45% Humulene: 17% Farnesene: <1%
Total Oil	1.2-1.8ml/100g
Flavour Intensity	8
